

AADK2 – Task 4

Student Name: Rajat Prakash Dhal

Course/Unit: Android Development with Kotlin – Session2

I selected the **Home Screen of a To-Do App** from **Google Keep** as a reference example. The screen displays a list of notes/tasks, a floating action button (FAB), and a simple top bar.

1 Structured Layout Critique

◆ Layout Clarity

- Information hierarchy is mostly clear.
- Notes are displayed in card format.
- However, primary action (Add note) is visually separated from content.

Verdict: Clear structure but could emphasize priority tasks better.

◆ Spacing

- Margins between cards vary slightly.
- Edge padding sometimes feels inconsistent.

Verdict: Needs a consistent spacing scale.

◆ Readability

- Titles are readable.
- Some secondary text has low contrast on light backgrounds.
- Line length is acceptable on phones.

Verdict: Minor contrast improvements needed.

◆ Navigation & Affordances

- FAB clearly indicates “Add”.
- Swipe gestures are discoverable but not obvious to new users.

Verdict: Intuitive but could include stronger visual cues.

◆ Accessibility

- Touch targets generally large enough.
- Some text contrast may not meet WCAG standards.

Verdict: Mostly accessible, but contrast can improve.

◆ Performance / Complexity

- Simple layout with cards.
- No heavy gradients or animations.

Verdict: Efficient and lightweight.

2 Proposed Improvements (Concrete Changes)

- Increase FAB touch target to minimum **56dp**.
- Use consistent **8dp spacing scale** between elements.
- Improve low-contrast secondary text color.
- Add subtle elevation to highlight important tasks.
- Increase title font weight for stronger hierarchy.
- Add visual divider between task groups.

3 Design System Starter (Compose-Ready)

Spacing Scale

Token Value Usage

xs	4dp	Icon spacing
sm	8dp	Between small elements
md	16dp	Section padding
lg	24dp	Large section spacing

Compose Usage Example:

```
Modifier.padding(16.dp)
```

```
Spacer(modifier = Modifier.height(8.dp))
```

Typography Tokens

Token	Size	Weight	Usage
TitleLarge	22sp	Bold	Screen headings
TitleMedium	18sp	SemiBold	Card titles
Body	16sp	Normal	Main content
Caption	14sp	Light	Secondary text

Compose Example:

```
Text(  
    "Task Title",  
    fontSize = 18.sp,  
    fontWeight = FontWeight.SemiBold  
)
```

Color Tokens

Token	Purpose
Primary	Main action color
OnPrimary	Text on primary
Background	Screen background
Surface	Card background
Error	Error states

Compose Example:

```
background(MaterialTheme.colorScheme.background)
```

Component Guidelines

Button

- Padding: 16dp horizontal, 12dp vertical
- Corner radius: 12dp
- Minimum height: 48dp

Compose:

```
Button(  
    modifier = Modifier  
        .fillMaxWidth()  
        .height(48.dp)  
)
```

Card

- Elevation: 4dp
- Padding: 16dp
- Rounded corners: 16dp

Compose:

```
Card(  
    shape = RoundedCornerShape(16.dp),  
    elevation = CardDefaults.cardElevation(4.dp)  
)
```

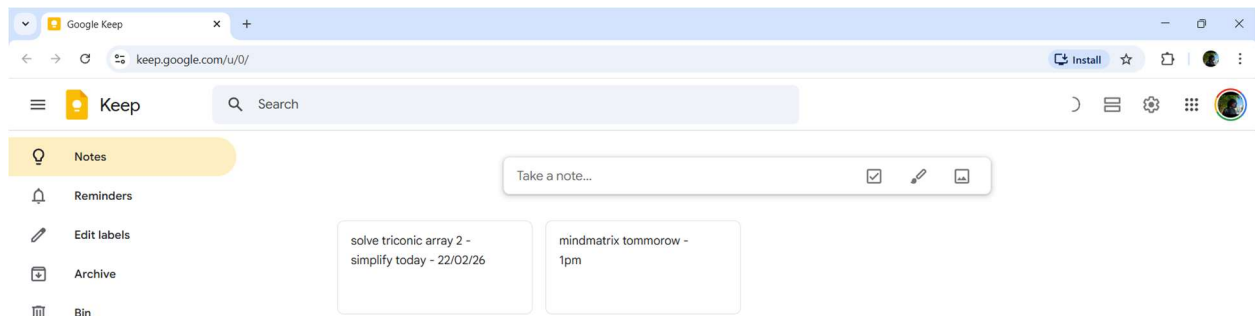

Input Field

- Full width
- 16dp outer padding
- Clear label

Compose:

```
OutlinedTextField(  
    modifier = Modifier.fillMaxWidth()  
)
```
