

AADK 4 - Task 2 — Design & Document a Business Card Layout (Pre-Code)

Student Name: Rajat Prakash Dhal

Course/Unit: Android Development with Kotlin – Session 4

USN: 1hk22cs115

email: 1hk22cs115@hkbk.edu.in

Concept: “My Developer Card”

Title & Subtitle

- **Rajat Prakash Dhal**
- *Android Developer | Kotlin & Jetpack Compose*

Short Bio

Passionate about building clean, responsive Android apps using Jetpack Compose with focus on structured UI and modern design practices.

✓ Mobile Portrait Layout

Visual Wireframe (ASCII Diagram)

Composable Structure Plan

Surface (backgroundColor)

Key Modifiers & Spacing

- 16dp outer card margin
- 16dp internal padding
- 8dp between icon and text
- 24dp before contact section
- fillMaxWidth() for contact rows

✅ Tablet / Landscape Variant

Layout Changes

- Switch from vertical Column to horizontal Row
- Increased padding (32dp)
- Wider spacing for better balance

Resource & Style Plan

Image Resource

- File: profile.png
- Location: res/drawable-nodpi/
- Reason: Prevent unwanted scaling across densities

Typography Tokens

- Title → 28sp (Bold)
- Subtitle → 18sp (Medium)
- Contact Info → 14sp (Regular)

Colour Palette

- Primary → #2E7D32
- Background → #F5F5F5
- Card → #FFFFFF
- Primary Text → #212121
- Secondary Text → #616161

Accessibility Plan

- contentDescription = "Profile photo of Rajat Prakash Dhal"
- Minimum touch size for icons → 48dp
- Maintain strong text contrast
- Support font scaling (avoid fixed height containers)

Short Reflection

I chose a clean and minimal layout to reflect professionalism and readability. I rely mostly on Column, Row, Card, Spacer, and spacing modifiers like padding() and spacedBy(). Planning both portrait and tablet layouts ensures responsiveness before coding. I will test using Compose Preview with different device sizes and font scaling enabled to validate spacing and accessibility.
